Perfect for educational purpose or creating professional content. Videoshop is YouTube for video looping. Video looping is basically a video clip that plays in a loop without ending. You can put your video clips in a sequence using basic cutting tools to create a video. Videoshop comes with Video toolkit, you can access everything in a single screen and play your video in edit mode. Videoshop is made for video editing beginners. It has lots of great features that would be enough to help you create professional content. While it's still in the beta phase, it's a great platform to start learning about video editing. Installing To get Videoshop on your computer, you need to install Video studio. It's a powerful video editing app that runs on Windows and macOS. It's also available for Android, iOS and other mobile devices. It's a perfect tool to create professional videos using your phone. To install Video studio, you can download the app or stream it via your favorite video streaming app. It's a free app, so you can use it as long as you want. You can access the app by clicking on the app icon in your Windows taskbar. One feature that makes Videoshop stand out is the preloaded collection of video loops and sequences. You can create professional videos with just a few clicks. Once installed, you'll get Videoshop application window. It's pretty much the same as YouTube studio, but with more powerful features. It's a standalone app, so you'll need to open Videoshop in the app window to edit your videos. Using Videoshop Creating professional videos is easy with Videoshop. There are two main screen, one is for video editing and the other is for sharing. You can add your video clips and apply effects in the timeline, then you can share the video on Facebook, YouTube or even Instagram. Videoshop comes with built-in tools to make video editing easy. Most of them are already available in YouTube studio, but with a few more powerful features. You can access them in the timeline by opening up Videoshop in edit mode. If you're just starting out, you can create a simple video by adding text and images to your timeline. You can also use the basic video tools to adjust the speed, volume, contrast and brightness.
